

Transition Planning with Trey: Transportation

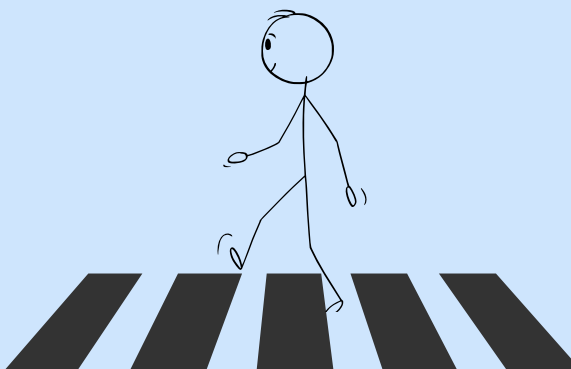

When I leave high school, I plan go to work, participate in sports teams, and take an art class. Transportation will get me where I want and need to go!

My trusted adults and I should consider whether or not it will be safe for me to drive. If it's not safe, I can explore other options like paratransit or public transit.

Map and GPS apps can help me get around the community safely. I practiced using these apps during my schools' community based instruction!

I am also practicing safety while out and about with my family. I am learning what different signs mean and how cross walks work. I also take my phone and ID with me wherever I go!
